

To Whom It May Concern:

As a consumer of XM Satellite Radio, I enjoy listening to all the venues XM has to offer. XM provides a quality standard that is premier, innovative and not readily available to everyone. This is an investment that I choose to subscribe to because of the options that XM has to offer me. Most importantly, and of great benefit to me are its traffic and weather channels. I can tune to these resources on a regular basis and hear the updated information that is important to my safe travels through my daily 1-hour commute around the Washington DC metro area. With this in mind, I respectfully request that the FCC reject the NAB's petition 04-160. I should not have to feel that I do not have the freedom to be able to support XM's ability to provide the kind of programming that I deserve and not have the restrictions that are attempting to be set forth by this petition.

Thank you for your consideration.

Respectfully submitted,

Jennifer Cooke
